

Donation to Wheeler Farm's Chicken Coop:

The chicken coop was constructed about 1910 with adobe interior walls and exterior fired brick. This building is one of the contributing structures on the National Register of Historic Places listing for Wheeler Farm. In 2022, we began restoration by removing layers of paint to return it to its original state. After the paint was removed it was determined that the building needs extensive repair and repointing of the exterior masonry. These funds will allow us to complete the restoration of this building including replacing the windows and improving the exterior enclosure.
