

As part of Salt Lake County's COVID response, the County has received, and continues to receive, an enormous amount of donations from private and non-profit entities. Because these were received in a state of emergency, and were being deployed at the same time, a detailed summary with quantities and values of every donation has not been created. If a more detailed summary is needed, it can be done, but would require additional staff time.

The purpose of this request (in the spirit of County Policy) is to put a broad summary of the donations before the County Council for recognition and approval. This is intended to apply to donations that have been received, and similar donations that will be received in coming months as part of the COVID response.

Most of all, we wish to recognize and thank the individuals and organizations that contributed to this effort in the spirit of caring and goodwill.

See list of organizations and donation summary below:
