Critical Skill Set

➤ Supply Chain Management	➤ Process Improvement	➤ Multi-Site Management
➤ Continuous Improvement	➤ Change Management	➤ New Product Commercialization
➤ Lean Projects	➤ Strategic Planning	➤ Strategic Consolidation
➤ Global Operations	➤ Leadership	➤ Supplier Management
➤ Strategic Sourcing	➤ System Implementation	➤ Trade Compliance
➤ FAR / DFAR	➤ Inventory Management	➤ Capital Management

Professional Employment History

VICE PRESIDENT of SUPPLY CHAIN, Easton Technical Products **2015-PRESENT**

Recruited to rebuild the global supply chain infrastructure in support of a company-wide lean implementation. Transformed tactical supply chain group into strategically focused and highly relevant team delivering value with bottom line savings. Provided strategic and tactical focus to successfully implement a strategic sourcing and a logistics traffic organization both of which achieved superior results and operational effectiveness.

- Retooled supply chain manpower and processes that led the improvement of customer fulfillment from 82% to 96%.
- Drove Inventory Reduction by 25% focusing on basics of MRP implementation, team building and lean.
- Led six Supply Chain Kaizen events with supply chain focused project teams that decreased lead time to the customer by involving customer's supply chain in events.
- Implemented second source initiative on all major commodity categories to support risk supply initiatives.
- Consolidated Packaging, Industrial Supply and Chemical vendors saving \$125,000 a year.
- Favorable Turn-around of Purchase Price Variances of \$500,000.
- Freight reduction of 43% year over year on inter-company freight by moving WIP closer to end customer.
- Renegotiated LTL / FTL and small parcel freight contracts saving over \$250K annually.

SENIOR SUPPLY CHAIN MANAGER, EXELIS INCORPORATED **2013 - 2015**

Strategic Supply Chain change leader reporting to the V.P. of Operations for a high growth, commercial and defense aerospace composites manufacturing company. Recruited to redesign and rebuild the entire global supply chain infrastructure in support of a 300% revenue growth curve. Spear-headed the complete retool of the entire ERP

system from Receiving Quality, Production Planning, Scheduling, and Warehousing. Charged with bringing division procurement into Federal Acquisition Regulation compliance on government contracts as well as cost improvement and inventory initiatives.

- Established (FAR/DFAR) Federal Acquisition Rules compliance program within Procurement function.
- Reinvented Receiving and Receiving Quality Control programs reducing receiving cycle time by 18 days and over 1 MM in inventory.
- Reduced on-hand inventory by 13% while growing revenue by 64% during the same period.
- Implemented eProcurement, P-Card, VMI, Consignment procurement actions saving company \$450K annually.

GLOBAL OPERATIONS MANAGER, BOART LONGYEAR,

2007-2013

Head of strategic and tactical Global Operations for a 200 Drill Rig Environmental & Infrastructure drilling division. Promoted by the Divisional VP to manage and improve Global Operations, Supply Chain, Capital Expense, Training Programs, Fleet Maintenance and International Logistics.

- Manage the international expansion of drill rigs, inventory and human capital into 10 new countries resulting in increased revenue and brand expansion.
- Oversee worldwide design, development, and implementation of competency based driller training certification programs.
- Led efforts for facility utilization and consolidations which resulted in annual cost savings YTD of \$4 million annually.
- Implemented Global Mobility and Trade Compliance programs to ensure 100% compliance with international expansion territory laws.
- Manage the divisions' MRO & capital budgets of over \$50 million annually.

GLOBAL SUPPLY CHAIN MANAGER

Ground up global Supply Chain implementation for the newly created Environmental and Infrastructures Drilling Services Division. Responsible for the creation and implementation of Global Planning, Production & Inventory Control, Manufacturing, Logistics, and Procurement programs. Managed strategic and tactical focus for the division's motor carrier fleet of approximately 1500 vehicles from procurement to disposal.

- Directed teams to maintain world class fulfillment rates at 96+%, while increasing inventory net turns by 105%.
- Develop E&I Global Supply Chain Tooling and Rig Spares Replenishment Models while maintaining 5 strategic warehouse locations in support of drill crews on 5 continents.
- Oversight of all Brand Management including the creative development of Sales and Product Catalogs.
- Developed and implemented the Sonic Drill Head Exchange Program – Led to reduce rig downtime rates throughout all operating entities and provided for the development of a Failure Mode Analysis Program which led to significant operational efficiency gains.
- Drove direct labor and efficiencies in Sonic Drill Head manufacturing / re-manufacturing to reduce total cost by 12.4%.
- Managed the facility shut-down and movement of the division's drill tools and drill rig manufacturing from the US to Europe while continuing to maintain on-time field service requirements for drilling operations worldwide.
- Established critical supplier contracts and an internal distribution model for Drill Supplies that led to a 21% reduction on field consumables cost.
- Oversaw the development of the divisions Fleet Management program; Including Driver Logs, Hours of Service, DOT Audits, and development of the Strategic Fleet Replacement Program.

DIRECTOR OF MANUFACTURING SUPPORT

SCHIFF NUTRITION ITNL.

1997 - 2007

Advanced through a series of progressively responsible leadership positions within the Schiff Nutrition leadership reporting to the VP of Operations and culminating in a newly defined position that crossed plant operations with supply chain management. Responsibilities included Corporate Planning, Production Control, Inventory Control and Production Operations for a high volume consumer packaged goods company. Strategic focus on the integration of supply chain functions with shop floor operations. Specific goals included the implementation of Master Schedules,

finite capacity analysis, and work order reconciliation. Manufacturing focus on raw material yields, labor productivity, and asset utilization, manufacturing budget, procurement and cost of goods responsibilities.

- Led cycle time initiatives across the supply chain to uncover non-productive inventory queues, which led to the reduction of total cycle time by 26%.
- Implemented finite scheduling software to maximize production efficiencies, while maintaining 98%+ customer fulfillment rates to large customers such as Wal-Mart and Costco.
- Reduced work in process levels 50% by utilizing Theory of Constraints within the tablet manufacturing process.
- Maintained world class fulfillment - 99.8%, while increasing Inventory Net Turns by 42%.
- Improved Manufacturing Productivity and Asset Utilization by 9%.

DIRECTOR OF MANUFACTURING DEVELOPMENT

Responsible for the Project Management, Engineering and Manufacturing Analysis functions. Managed the relationship with Marketing and Operations on all new product commercialization process, the ECN process, and packaging Engineering. Additional responsibilities included strategic analysis on manufacturing capacities, plant justification, and outsource partners.

- Successfully spearheaded 325 new products and over 1000 product change orders into the marketplace.
- Implemented and directed corporate cost reduction program (Continuous Improvement Program) that realized savings of 10+ million dollars in first two years.
- Developed and cultivated strategic outsource partnerships with key vendors with regard to new and existing products.
- Managed Packaging Engineering operations from new equipment procurement, new product packaging, and vendor selection for packaging production lines.

SUPPLY CHAIN MANAGER

Responsibilities included procurement of all raw materials, outsourced finished goods, production planning and scheduling of five manufacturing facilities.

- Developed and implemented production planning procedures which reduced total inventory levels from \$51 Million to \$21 Million.
- Reduced Safety Stock Levels by 75% to <\$3M through the implementation of dynamic safety stock calculation
- Increased Overall Customer Fulfillment from 94% to 97% by building a team focused on customer service while reducing overall finished goods and raw material inventories.
- Managed 13 outsource vendors including contract negotiation for all supply and standard costing.

LOGISTICS SUPERVISOR

NESTLE BEVERAGE CORPORATION

1990 TO 1997

Responsibilities included Inventory Control and Production Planning for a 25 million case beverage manufacturing facility and the logistics operations for two 250,000 square ft. distribution facilities with \$150M cost of goods sold.

- Development and implementation of distribution planning models reducing customer wait & load times by 53%.
- Introduced new production planning and scheduling systems to optimize line change over patterns.
- Process Team Member on SAP R3 conversion team.
- Developed new Production Scheduling / Ordering Systems.

Education

Bachelor of Arts — Communications, California State University – Fullerton
