Name: Health Security Panel upgrades

Request Description: Project is to upgrade the security panels at 6 health locations. The upgrade is to move the manual process for building and Security codes to remote access. This will ensure a quicker response time to deactivate and create building and security codes. Currently it can take an entire day to drive around to each location to manually update security codes. Updating the system will change this access remotely and can be as quick as 30 minutes to update all locations which is great for security, saves time, and expense to the customer since it shortens the amount of time it take to go to each location.

Current Stage	Type	Council Approval	Council Approval Date
