

Hello Council Members, your time and efforts are greatly appreciated. This is the outline I will be presenting regarding Title 19 proposed Ordinance changes at the public hearing on February 6, 2024.

- \* 2016 \$280,000 fine regarding MS4 permit
  - This fine involved areas 15 miles away from Rose Creek and had nothing to do with E. coli

MS4 Inspection  
Report March 2012.pd

- \* It is unclear why MPD was conducting public hearings on an issue that is **not in a protected watershed** and not in the Wasatch Mountains
- \* EPA and Utah Division of Water Quality have both stated they are **not aware of any pending enforcement action against S. L. County**. They are only asking for a Best Management Practices plan.
- \* It is indicated in the FA/FR Ordinance Amendment Staff Report, (pg. 5) that Rose Creek is a tributary to the Jordan River. We will show that **Rose Creek doesn't reach the Jordan River**.
- \* Also stated in that staff report was that the E. coli levels were highest June – October. We will show that **100% of Rose Creek water is diverted from Mid March – December**, except for one 36 hour period, once per year.

12/23/23

01/25/24

- \* There are numerous types of E. coli. The type found in horses is **not pathogenic and not harmful to humans.**

<https://njaes.rutgers.edu/fs036/>

- \* There are **12,000 deer** living in the Oquirrh Mountains (location of Rose Creek). There are also **100's of turkeys.**

<https://wildlifemigration.utah.gov/land-animals/corridors/>

- \* **Source testing has not been done** on Rose Creek to determine where E. coli is coming from.

- \* Residents in Rose Canyon are **actively working with DWQ, Farm Bureau, and the Dept. of Agriculture** on projects to help protect Rose Creek.

- \* Rose Creek has a **healthy riparian barrier.** Dept. of Agriculture has visited the creek and agree..

- \* Rose Canyon is a **high risk fire zone.** Multiple Utah government agencies are using **cattle for fire mitigation.** The Department of Agriculture, Farm Bureau, and the Herriman Fire Department support this.

<https://www.utahfarmbureau.org/Article/A-Call-for-More-Firefighting-Cows-Sheep>

- \* The proposed ordinance will **eliminate the animal rights for most residents.**

- \* Ephemeral Streams.

- \* 30% slopes.

- \* Residents are only grandfathered if they have a permit which is not required.

- \* Herriman City Code allows more than this proposed ordinance, in some cases, double.

- \* Taking away our heritage of horse ownership is unjust. 4-H participation, Rodeo...

- \* Boarding a horse costs \$450.00/month per horse.

\* Some horse and cattle owners in Rose Canyon are **decedents of the people who settled Rose Canyon.**

\* S.L. County owns **Yellow Fork** where 100's of people take their horses, dogs, and mountain bikes every year.

\* Complaints to the county from residents about horses came from the Foothill Recreational Zone, not the **Foothill Agricultural Zone (Rose Canyon).**
