Form ID: 33116

Name: TI_AGE012 - Tenth East Senior Center Remodel

Request Description: During schematic design, it was discovered the building was in a newly re-defined earthquake fault zone. This led to extensive investigations, material testing, and updated engineering considerations. These additional costs have reduced monies available for construction as well as threaten some of the upgrades that are critical to this facility. This request provides funding to address these and other needs as part of this project. It also allows this project to address the items associated with AGE013 and AGE2017TEABAT, therefore this request is to consolidate all 3 budgets.
