

# Riverview Park Improvements

Upgrades and maintenance

# Add Pickleball Courts

Change the existing tennis courts to pickleball courts. Add lighting for extended hours of play.

# The current playground

- *The current playground has old stainless steel slides which are safety issues. The current playground has wood fiber for the protective surface. We will install poured in place for better ADA access.*

# Rendition of new playground

- *There is so much versatility with poured in place and this rendition is of a river running through the area, highlighting the name of the park.*

# Pavilion maintenance

- *We will put new paint on all the woodwork. We will also put more lighting in the pavilion on the downside of the ceiling. We will put in new benches.*

## Repair/Replace path issues.

- *Will remove problem path areas and replace with new concrete.*

# Replace Path Lighting

- The lights haven't been working in the park. Some of the power lines are missing and there is collapsed conduit. We are going to use solar power for the lighting.

# Horse Shoe pit

- Will remove horse shoe pit as it doesn't get used very often and replace with grass giving more green space for sitting in the shade and having picnics.
