Which Boards would you like to apply for?

Board of Health: Submitted

Referred by:

self

Qualifications

Please tell us about yourself.

I am a retired pediatrician. I previously served on the Salt Lake County Board of Health from 2015 to 2021, and served as Chair during 2019. I continue to be an active advocate for children and families, and I believe that my input and perspective can serve the citizens of Salt Lake County.

Why are you interested in serving on a board or commission?

Salt Lake County's citizens continue to be at risk from illness, injury, and exposure to environmental toxins. While our Health Department employees devote their considerable expertise and passion to protect our citizens, their work is little respected and poorly funded by our state legislature, and poorly understood by our community. I have been involved in health care for 40 years, including experience with commercial, non-profit, and publicly-funded health care delivery.

What education, work experience, or volunteer experience do you have that applies to the board you are applying for?

I am a board-certified pediatrician, now retired, but still maintain an active medical licence. I have several decades of experience with advocacy for children and families health and mental health issues, to the community, to payers, to the Utah legislature, and to our Congressional delegation.

What unique perspectives could you bring to the board?

Children comprise 30% of our population, and children are particularly vulnerable to public health risks. I am acutely aware of the varied physical and mental health risks to our children, including their increased risks from pollution, increased emotional health vulnerabilities from domestic violence and housing insecurity, to their need for safe play spaces.

CDC Childhood Immunization Champion, 2012.

AAP Utah Chapter, Marty Palmer Service to Children Award, 2016.

Voices for Utah Children, Children Champions Award, October 11, 2019.

Philosophical Stance:

As a pediatrician, my career has focused on children concerning: 1. Alleviating the pain and fear that a family is dealing with during an acute illness or injury; 2. Preventing further illness by use of education and immunizations; and 3. Preventing injury by counseling regarding car seats, helmets, and close supervision of children. Since retiring, I have invested my time in actively advocating for the physical and mental health needs of children and families. My orientation toward prevention has led me to a strong public health involvement in engaging the community to support every child across the entire continuum of needs: physical and emotional health, safety, nutrition, early care and learning, and education.

A child carries the hope of the community's future, and each child deserves the opportunity to thrive and to contribute.
