

Household Hazardous Waste Program

New Facility

What is Household Hazardous Waste?

Household Hazardous Waste Program Development

History of Program:

- 1991 held first collection event – 20,000 pounds collected
- 1996 SLCo facility was built
- 1998 2nd facility was built at TransJordan Landfill
- 2001 Murray ABOP (Antifreeze, Batteries, Oil and Paint)
- 2002 Library partnerships to collect lightbulbs
- 2006 Sandy ABOP (Antifreeze, Batteries, Oil and Paint)
- 2008 Collection of E-waste

HHW Growth	2008	2019
Chemical	1,000,000 (lbs.)	1,496,336 (lbs.)
E-waste	119,200 (lbs.)	500,713 (lbs.)

The Future

A new indoor conveniently located facility much like other jurisdictions and municipalities have provided for their residents to:

- Provide better customer service.
- Create a safer work environment for employees.
- Increase reuse and recycling potential in the Valley.
- Increase the rate of collection.

Partnership with Sandy

- Sandy City has been a partner over the years with community collection events and Antifreeze, Battery, Oil and Paint collection site (ABOP).
- Participation at these events has always been high indicating an active interest in homeowners.
- A lease with Sandy City was developed and signed.
- New facility will be in the Sandy City Public Works complex.

Budget Adjustment Request

\$765,832 Adjustment

Request funded by prior
year Health Fund balance
and HHW Assigned Fund.

Original project estimate completed prior to a site being finalized. During design, the project team determined site requirements exceeded original estimate – access roads, fencing, landscaping and storm drain needs.

Impacted by a robust construction market.

Project team will continue to design and construct a facility that meets all programmatic needs and is sustainable and energy efficient.

Thank You

Karen Crompton, Director Human Services

Tyson Kyhl, Associate Division Director Facilities Management

Eric Michaels, Environmental Health Supervisor
