

Criminal Justice Services Data & Dashboards

Evidence-Based Practices

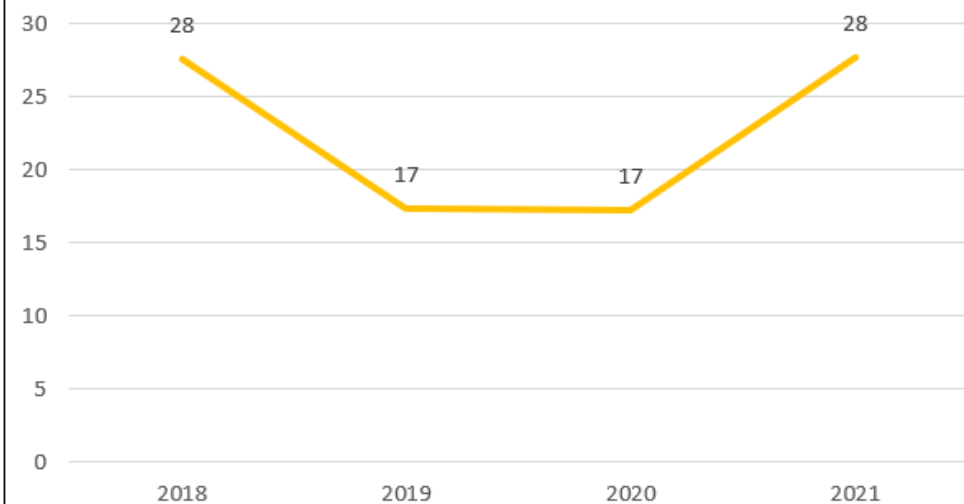

- Risk Assessments - identifying criminogenic needs
- Case Planning - targeted approach to reducing recidivism

COVID-19 Impact

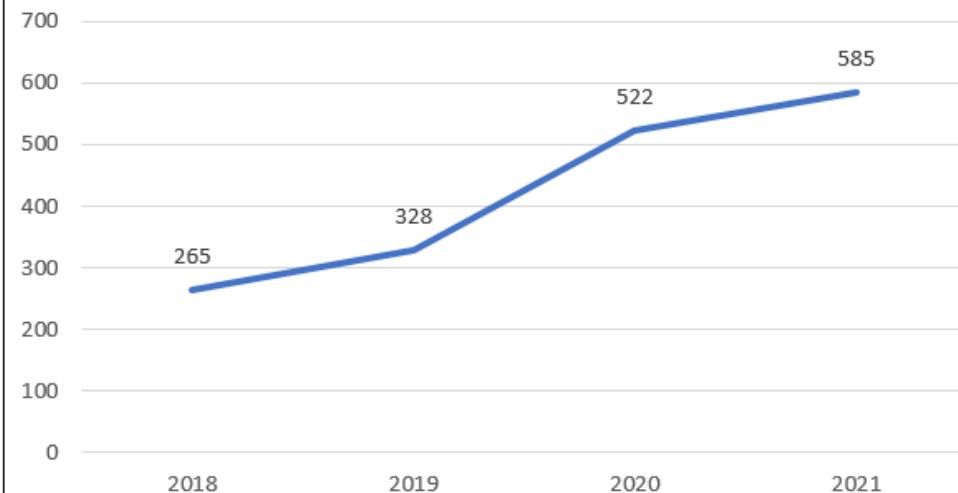

- Court Closures
- Referrals [New Clients]
- Caseloads

Referrals

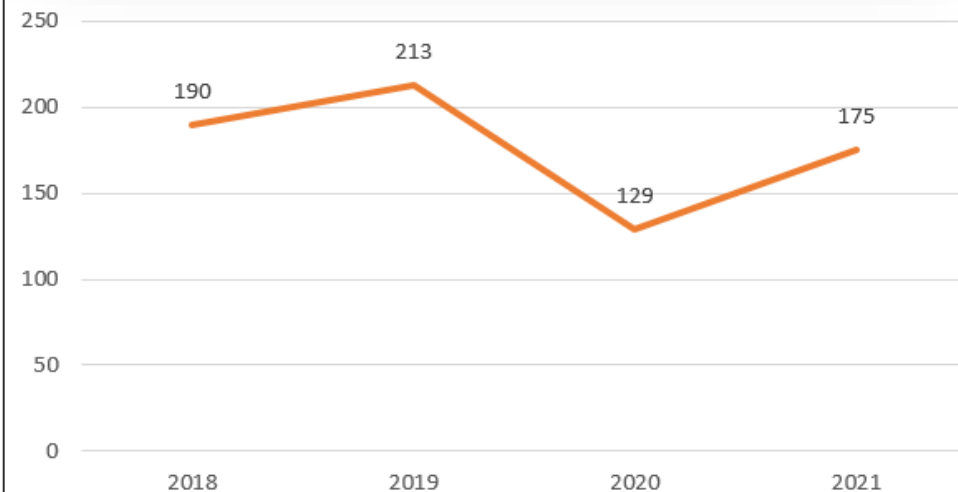

Specialty Court: New Clients AVG

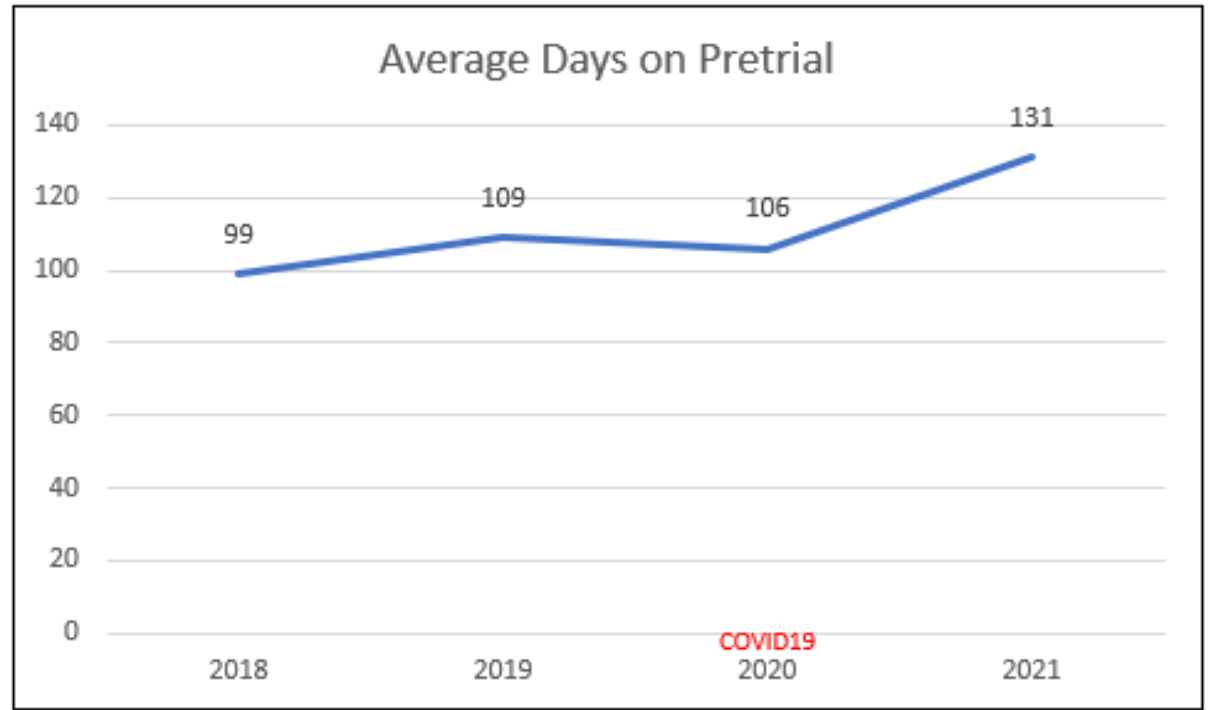

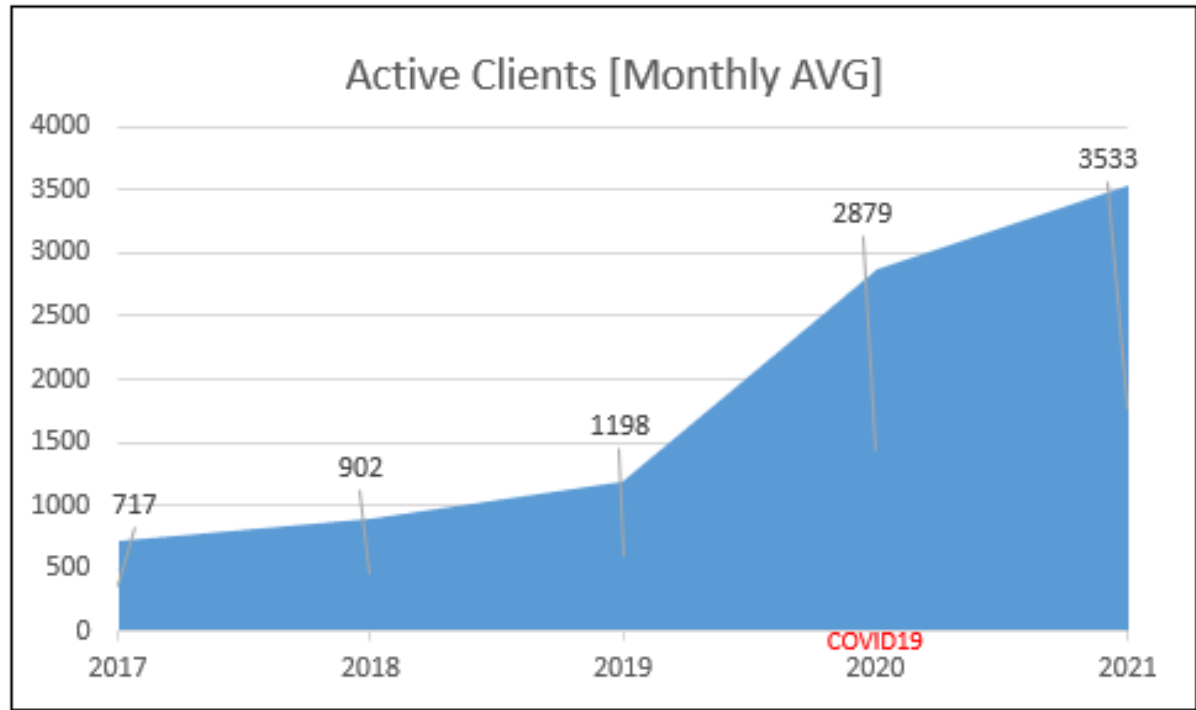

Pretrial: New Clients AVG

Probation: New Clients AVG

Pretrial: Non-financial release from jail by risk assessment; case managers assist client appearance in court by removing barriers (transportation, technical assistance, court date reminders).

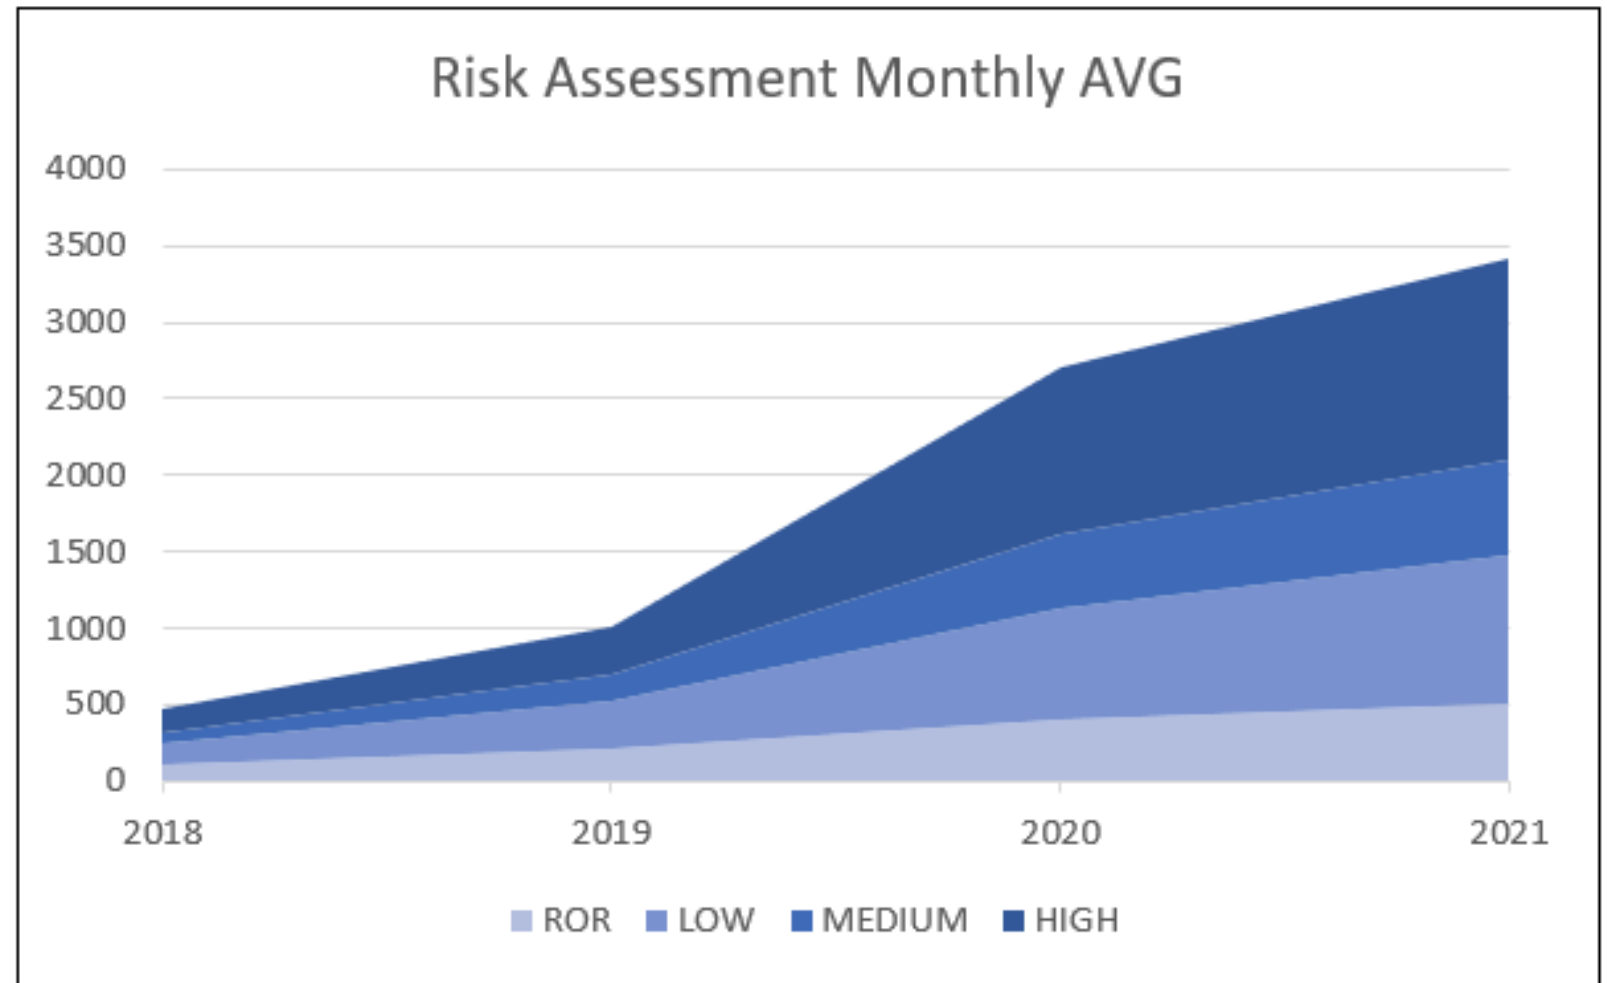

COVID: Increased the number of pretrial supervisions; both pretrial release and judge ordered release. Court closures and hearing continuances have increased the length of time on pretrial release.

Pretrial Risk Assessment

Pretrial utilizes an evidence-based assessment called the Public Safety Assessment [PSA].

This assessment is used to determine supervision level.

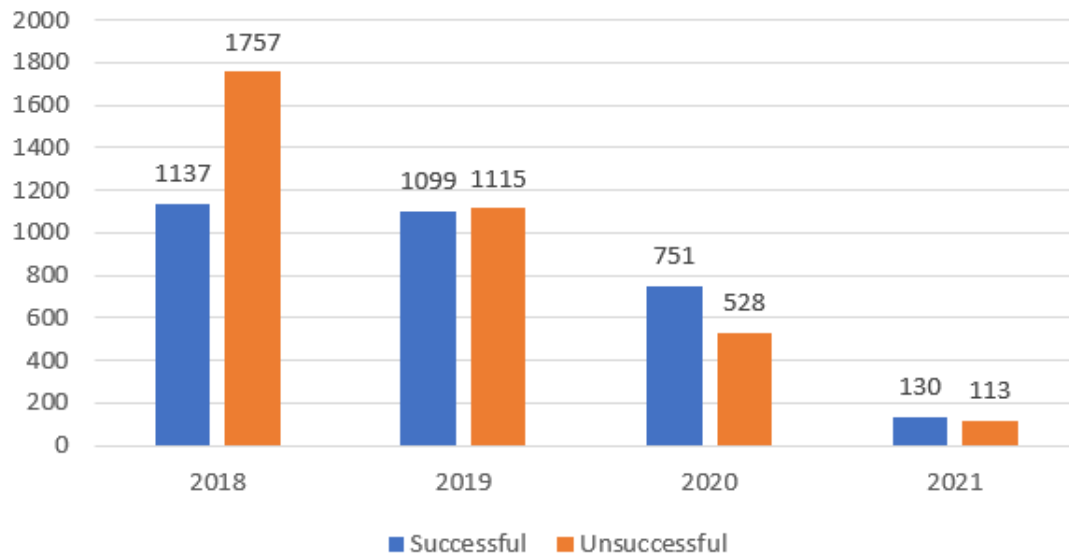

Probation:

Supervision of Class A Misdemeanor and lower convictions (DUI, Drug Possession, Domestic Violence, Assault, Theft, etc.). Supervision is based in the individual's risk – the higher the risk the more time/resources are needed.

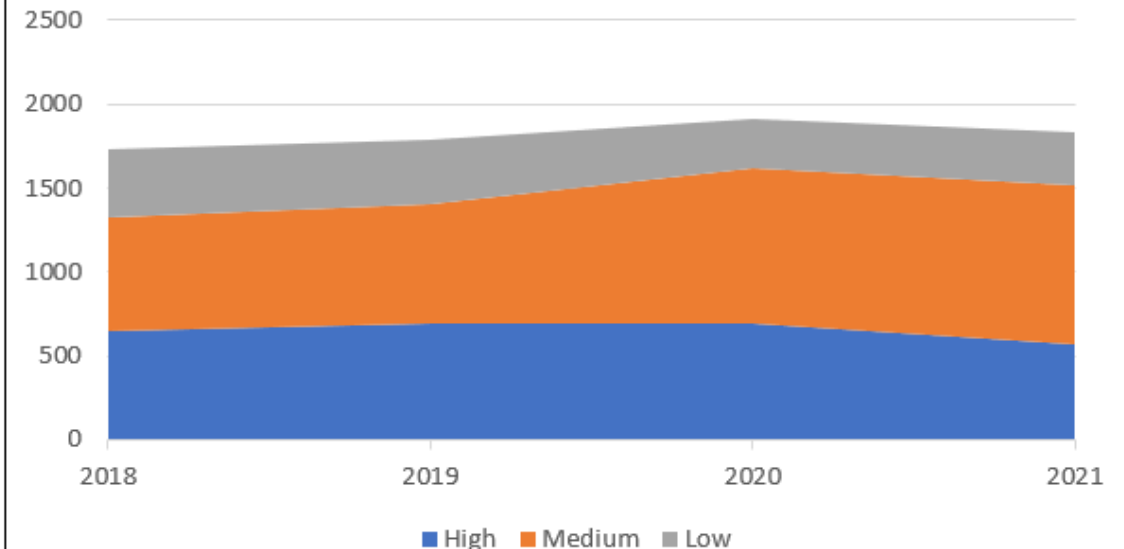

Success Rate:

By utilizing evidence-based practices and focusing on the top criminogenic needs, case managers are having greater success with clients.

Probation Overall

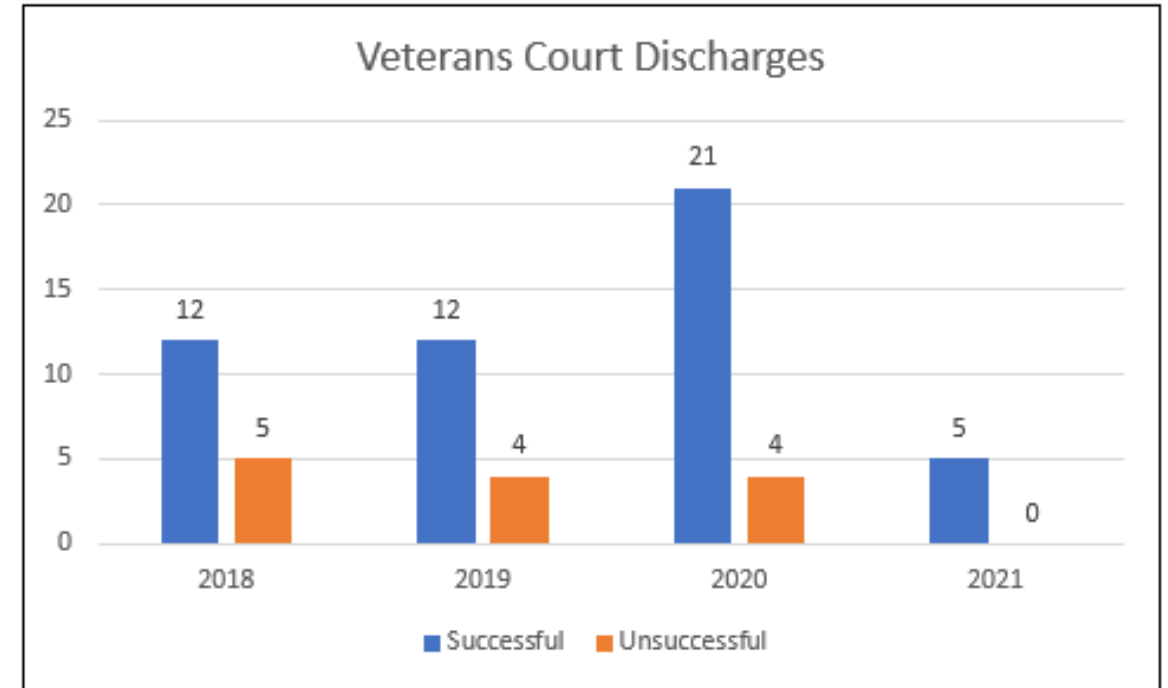

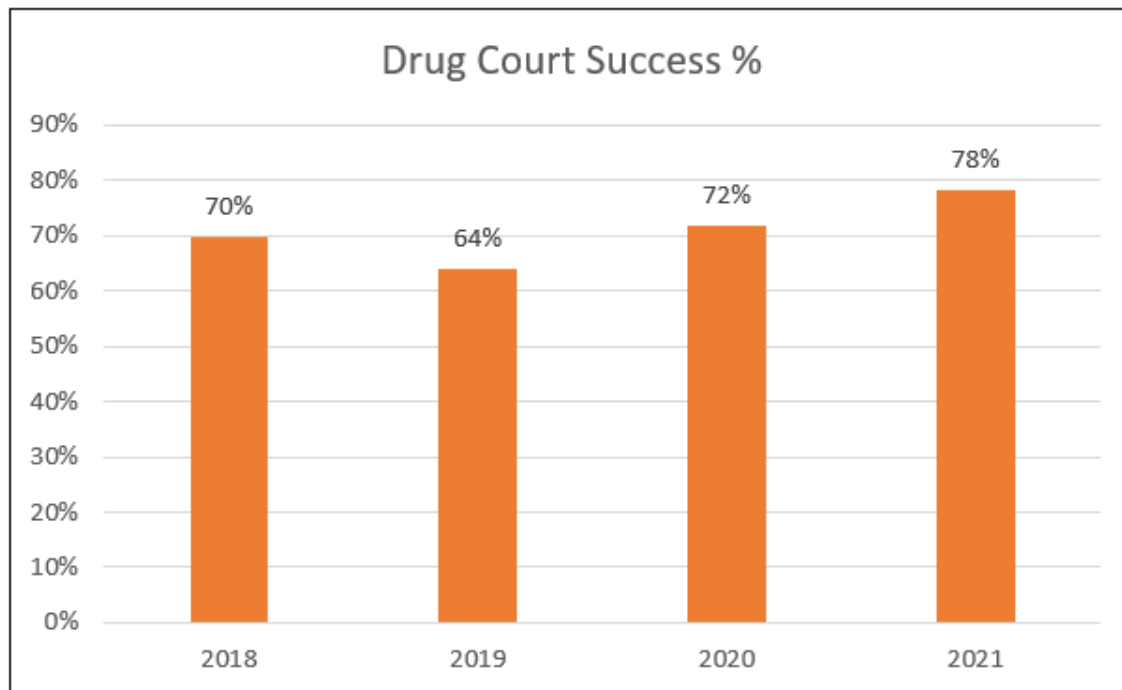

Risk Assessment Monthly AVG

Treatment Courts

A collaborative approach to addressing clients' substance use and mental health disorders. The focus is accountability and treatment over prison or jail sentences.

COVID:

Data shows an increase in successful graduates over this time. Additional outreach, focus on both treatment and sanctions, instead of jail have been positive.

By utilizing evidence-based practices and focusing on the top criminogenic needs, case managers are having increased success with clients.

Demographic Dashboard January 1, 2021 - Present
