Requested Agenda Date:

3/19/2024

Requested Agenda Title:

Budget Adjustment: Rampton Salt Palace requests to transfer \$50,000 in underspend budget from the concourse carpet project to replace the building grease separators.

Requested Agenda Item Description: Grease separators are devices designed to collect fats, oils, and grease from wastewater before it enters the main sewer system. They prevent the flow of these substances into municipal sewage. Normally we would repair this (grease separators), but the parts that we would normally buy to repair are now discontinued, so this is a replacement of the current grease separators that we currently have.

The grease separators are attached to the building. Unused available funds from Project SP19_07 will fund SP24_20 (This Project).
